Subject Index Volume 281

Acetylcholine iontophoresis 373
Acitretin 424
Acne 502
Adenylate cyclase 215
Adhesion molecules 454
Alopecia 247
Alpha-fluoromethylhistidine 99
Anacardic acids 227
Anagen hair 507
– – bulb 188
– – follicles 254
Anaphylatoxins 482
Androgens 247, 417
Antarctic krill (*E. superba*) 105
Anthralin 52
Antiandrogens 247
Anti-basement membrane zone antibodies 504
Anticardiolipin antibody 296
Antigen presenting cells 219
Antikeratin antibodies 185
– autoantibodies 377
Arthropathy 185
Arthus reaction 327
Asebia mouse 366
A-type particles 284
Autoantibodies 291
Autoimmune diseases 89
Automated microscopy 336
Autoradiography 209
Axon reflex stimulation 373

Basal cell carcinomas 83
Basement membrane 267, 427
Bioassay 398
Biochemical/biological profile 105
Bluefarb-Stewart syndrome 35
BLV 213
Brain cooling 66
Breaking pattern 188
Bromodeoxyuridine 209
Bullous pemphigoid 304
– – antigen 443, 449

C5a 401, 482
– anaphylatoxin 31
Café au lait macules 510
Calcium 40
Candida albicans 342
Cardanols 227
Cardols 227
Cathepsin D 231
Cats 541
Cell cycle kinetics 507
– diapedesis 475
– proliferation 487
– surface labeling 463
Cell-free translation 449
Cellular protein 487
Chemiluminescence 304
Chemotaxis 482
Chlorpromazine 60
Cholesterol sulfate 411
Chymase 231
Class II antigens 260
Clotrimazole 198
Cold urticaria 99
Collagen 267
– synthesis 288
Collagenase 11
Colorimeter 293
Complement components 406
Complicated leg ulcer 206
Confocal scanning laser microscope 521
Contact allergy 57
– hypersensitivity 355
– sensitivity 57
Cryosubstitution 443
Crystal violet 487
C-type particles 284
Cutaneous candidiasis 279
– inflammation 475
– reaction 437
– vasculitis 296
Cyclic AMP 215
– nucleotides 203
β-Cyclodextrin 60
Cyclohexylsilane-bonded phase column 411
Cyclosporin A 219, 536
Cytochrome P-450 isozymes 198
Cytokeratins 83

2D-PAGE 495
3-D reconstruction 521
Dandruff 482
Dehydroepiandrosterone sulfate 507
Delayed hypersensitivity 227
Dermal equivalent 267
Dermal-epidermal recombinants 267
Dermatitis herpetiformis 406
Dermis phenotype 538
Dermoepidermal junction 321
Development 433
Dexamethasone 273
Diabetes 424
Diazolidinyl urea 57
1α,25-Dihydroxyvitamin D_3 355
Dimethyl-β-cyclodextrin 60
Disease progression 299
Dithranol 362
DNA hybridization 213
Dosage 536
Dose responses 351
Drug efficacy 193
– solubility 193
Dry skin 45

EGF receptor 83
Electron microscopy 165, 254
ELISA 398
Elution 406
Endocytotic processes 475
Entactin 427
Enzymatic debridement 105
Eosinophil 304
Epidermal calmodulin 73
– cells 316, 487
– cyst 31
– keratinocytes 491
– proliferation 279
Epidermis 215, 366, 387, 417
Epidermolysis bullosa acquisita 1
– – simplex 5
Erythema 293
Etretin 165
Extracellular proteinase 78, 342

Fibroblasts 11
Fibronectin 11, 440
Flow cytometry 507
Flushing 66
Foot pad function 541
Formaldehyde releasers 57
Free radicals 40, 362

Gas-liquid chromatography 411
Gene expression 514
Ginkgo biloba L. 227
Glutathione S-transferase 433
Glycoprotein 427
Glycosaminoglycan 11
Granulocyte-macrophage colony-stimulating factor 310
Grenz rays 111
Growth factor 178, 383, 530
Guanethidine (Ismelin) 206

Hailey-Hailey disease 538
Hair 247
– fibrous proteins 495
– matrix proteins 495
– tissues 238
Helminthotoxicity 304
Hematoporphyrin derivatives 491
Hemidesmosome 443
Henle's cells 254
Henoch-Schönlein purpura 296
Heparan sulfate-containing proteoglycan 440
Hermansky-Pudlak syndrome 40
Herpes simplex virus 333
15-HETE 401
Heterosexual transmission of HIV 369
Hirsutism 507
Histamine 99, 231, 288, 362
– synthesis, inhibition of 99
Histamine-*N*-methyltransferase 231
Histochemistry 541
HIV infection 299, 369
HSRV 213
Human epidermis 73
– melanomas 173
– skin 440, 521
– – fibroblasts 273
Huxley's cells 254
Hydrocortisone 215
Hyperproliferation 366

Image analysis 336
Immune functions 299
Immunoblotting 89
Immunocompetent cells 321
Immunodermatopathology 24
Immunoelectron microscopy 427, 443
Immunoglobulins 406
Immunogold 443
Immunohistochemical localization 440
Immunostimulation 526
In situ hybridization 333, 336
In vitro binding sites 504
Inclusion complex 60
Indirect immunofluorescence 291
Innermost cell layer 254
Integrins 454
Intercellular lipids 45
Interferon-gamma 260
Interferons 11, 392
Interleukin 475
Interleukin-2 310
Interleukin-3 310
Interleukin-4 310
Involucrin 83
Iodogen 463
Ionizing radiation 111
Irritation 293
Isotretinoin 424

Kallikrein 437
KB cells 89
Keratin intermediate filament 5
Keratinocyte cell cultures 40, 267
Keratinocytes 1, 5, 260, 530
Keratins 463, 495
Ki-67 antigen 173

Labeling index 75
Langerhans cells 75, 219, 327, 433, 521, 526
Laser Doppler flowmeter 293
– light 491
Leukocyte aggregation 519
Leukotriene B_4 401
Lichen amyloidosus 377
– planus pemphigoides 504
Linear localized scleroderma 288
Lipid peroxidation 491
Lipopolysaccaride 316
Lipoprotein lipase 116
Liver effects 198
Lupus erythematosus 327, 470
Lymphocyte epidermotropism 454
Lymphocytes 203, 321
Lymphomatoid contact dermatitis 321
Lysosomal enzymes 491

Macrophages 321
Macular amyloidosis 377
Mast cells 288, 387
Mechanical plucking 188
Medium pH 342
Melanin 52
Melanocyte culture 178
Melanocytes 510
Melanoma 81, 284
Membrane receptor 304
Memory T cells 24
Methyl nicotinate 95
Microcirculatory sensitivity 95
Microsporum canis 238
Mitotic rate 173
Monoclonal antibodies 219
Monocytes 219
Monolayers 463
Monooxygenase activities 198
Mouse 247
MRL/lpr mice 327
mRNA 273

Naive T cells 24
Neonatal rats 198
Netherton's syndrome 165
Neurofibromatosis 510
Neutrophils 203, 279
Nevoid basal cell carcinoma syndrome 218
Nocardiae 78
Nonhistone proteins 19
Nuclear-specific antibodies 383

Occupational contact dermatitis 321
Ointment vehicle 193
OK-432 310
Organ culture 417
Ornithine decarboxylase 514

Pam cells 449
Pelvic ultrasound 502
Pemphigus 519, 538
Percutaneous absorption rates 95
Photoallergic contact dermatitis 60
Photocarcinogenesis 514
Photochemical reactivity 60
Photosensitivity 351, 470
Pityrosporum ovale 31
Platelet activating factor 362
Platelet-derived growth factor 383
Polycystic ovaries 502
Polymorphonuclear leukocytes 475
Porphyria cutanea tarda 291
Postganglionic sweat output 373
Procoagulant activity 316
Proliferation 209
Propionibacterium acnes 31
Prostaglandin E 215
– synthesis 433
Prostaglandins 362
Proteases 105
Protein phosphorylation 19
Pruritus 111
Pseudo-Kaposi's sarcoma 35
Psoriasis 19, 73, 185, 213, 215, 219, 310, 387, 392, 398, 519, 536
Psychosocial predictors 111
Pustulosis palmoplantaris 185
PUVA treatment 178

Radical scavenger 52
Rat skin 433
Recessive X-linked ichthyosis 411
Reconstructed epidermis 538
cis-Retinoate 116
13-*cis*-Retinoic acid 273
Retinoid therapy 165
Retroviruses 284
RIS block 206
Rosacea 66

S-Carbamoylmethylation 495
Scleroderma 383
Sebum excretion 346
– resorption 346
Seroepidemiology 369
Serum lipids 116
Sheep culture 530
Simian virus 40 1
Sister chromatid exchanges 218
Skin effects 198
– immune system 24
– penetration 60
– surface lipids 346
SLE 89, 203
Soluble Il-2 receptors 299
Splenopentin 526
Squamous cell carcinomas 83, 333
SS-A/Ro antibody 89
SS-B/La antibody 89
Staphylococcus aureus 31
– *epidermidis* 31
Stratum corneum 45, 346, 541
Sudomotor axon reflex test 373
Surfactant 45
Systemic lupus erythematosus 291

T cells 219
T-cell subsets 24
Testosterone 507
Tetrachlorosalicylanilide 351
Tinea capitis 238
Tonofilaments 254
Transepidermal water loss 293
Triacylglycerol 116
Trichogram 188
Trichophyton violaceum 238
Tryptase 231, 387
Tumor necrosis factor (TNF)-α 398
– promotion 514
– thickness 81

Ultrastructure 35
Ultraviolet A 351
– radiation 470
Ultraviolet-B 366, 514
Urticaria 437
Urushiol 227

Vena angularis (oculi) 66
– facialis 66
Virus and cancer 333
Vitamin D_3 355
Vitiligo 52, 178

Water retention 45
Wound healing 424

X-rays 111

Abstracts (ADF-Meeting, Hamburg 1989 544
